# ARF-95 SERIES ANIMAL TRANSPORT UNIT

Six (6) Animal Compartments and One (1) Storage Compartment

## Standard Construction

- Full 100% fiberglass-reinforced plastic construction throughout.
- Tubular 11 gauge steel cross members – molded into bottom of unit.
- Sides skirted to center line of rear wheels with fluted trim.
- Each compartment constructed separately, to prohibit contact with animals in adjoining compartments.
- Compartments finished smooth with rounded corners to facilitate cleaning. No sharp edges or cracks to collect dirt.
- Drain pan in front of each compartment, with drain hole.
- Compartment opening flush all around. No door frame or roof rail protrusions to hinder removal of animals or cleanout.
- Compartment doors molded with five (5) extra large louvers on outside panel.
- Heavy Duty wire grille safety doors installed inside regular doors. Protects against escape of animal when outer door is opened. Swings out to provide full use of depth of compartment.
- Stainless steel door hinges and latches equipped with cylinder locks, all keyed alike. Large 6" handle for ease in opening.
- Roof reinforced underneath to provide adequate strength and durability.
- Standard large equipment compartment longitudinally between rear animal compartments
- 750 CFM Fresh-Air Blower System installed to distribute fresh oxygen-bearing air equally to all compartments, exchanging air approximately 5 times per minute.
- Housing for Fresh-Air Blower System on roof with air distribution tunnel providing equal distribution to all compartments.
- Standard full through compartment with center divider door.
- All LED body lights, reflectors, rear stop, tail, turn signals, back-up, and license lights installed – as required by Federal Highway Safety regulations.
- LED auxiliary 4-way flashers, red lens, 4 1/8" diameter. Operates through rear stop and turn lamps. Affords added safety.
- Heavy steel rear bumper installed with aluminum tread plate STEP/CAP. Mud and splash guards installed at rear wheels.
- Mounted onto chassis frame using three mounting-points on each side of frame. Rubber mounting isolators used to reduce excess vibration and strain on body.
- Color is white.
- Constructed with extra strength to resist damage, but if repairs are needed it is a simple operation. Merely clean damaged area and fill with fiberglass-plastic body filler as used by all boat marinas and auto body repair shops.

## ARF-95 OPTIONAL ITEMS

### Catch Pole Holder & Portable Pet Step Ramp

Installed in rear storage compartment.

### Slide-Out Trays

Installed in curbed rear compartment.  
Holds 6 carriers or 4 traps.
